The Ohio State Board of Emergency Medical, Fire and Transportation Services and the EMS Division of the Ohio Department of Public Safety would like to thank the myriad of people – too numerous to list here – who have worked tirelessly to create, expand and transform the EMS Incident Reporting System from its inception and early beginnings at the turn of the century into the robust research and policymaking tool it is today. This growth and development would not have been possible without the strength of their combined knowledge, wisdom and hard work.

EMSIRS is a component of the Ohio Data Systems and is maintained by the Ohio Department of Public Safety, 1970 W. Broad St., Columbus, Ohio 43218. For more information about the EMS Incident Reporting System, contact the Ohio Department of Public Safety's EMS Office of Research and Analysis, at

What is the EMS Incident Reporting System (EMSIRS)

History: Information collected will be used as a guide to determine the impact of training and the areas that need to be focused on for training. The Division will hold any patient record collected in the strictest confidence allowable by Ohio Law. Annually the Ohio Department of Public Safety Division of EMS will generate a statistical report. This report will be considered public record and will be disbursed to interested parties.

The basis for the data elements collected by EMSIRS is the national standard EMS data set created by the National EMS Information System (NEMSIS). The NEMSIS data set was created to replace the aging and increasingly ineffective Uniform Prehospital Data Set, which was the national standard from 1992 until 2004, and was the basis for the original EMSIRS data set.

In the first version of EMSIRS, we collected 55 essential elements in 6 general categories, (Incident Demographics, Patient Demographics, Assessment, Procedures, Medications and Disposition.) In the second data set (EMSIRS-2) we collect 80 required elements.

In version 1, entries that are described as “Essential” are to be reported to the state for use in the EMS Incident Reporting Database. Entries that are for "Local Use Only" will be included in the state developed software and may be used for local reporting, but are not required to be reported to the state. "Local Use Only" data elements will not be included in state run reports. In version 2, the “Optional” entries are used for local reporting.

The 'Local Use Only' fields or the 'Optional' will be used in the ODPS/EMS web-based application and will not be included in the submission structure for agencies that have either in-house software or vendor created software.

Why: §4765.06 of Ohio Revised Code 11/12/92

The state board of emergency medical services shall establish an emergency medical services incidence reporting system for the collection of information regarding the delivery of emergency medical services in this state and the frequency at which the services are provided. All emergency medical service organizations shall submit to the board any information that the board determines is necessary for maintaining the incidence reporting system.

Who reports: EMS incident includes any ground or air response to a call for emergency medical services by a public or private emergency medical service organization.

Emergency runs only.

The final transporting agency is responsible for reporting the incidence. Agencies using the web-based application may add incidence that they do not transport, this information will not be included in any statistical reports produced.

- Final Transporting Unit Reports.
- If patient transported to Air Medical Unit, the Air Medical Unit will report.
- If patient transported to a hospital then transferred to another hospital, both units will report.
- If Unit 1 responds and Unit 2 transports, Unit 2 will report.
- If Unit 1 transports and transfers care to Unit 2, Unit 2 will report.
- If two agencies respond and no transport occurs, the first responding agency reports.
- Emergency Medical Responders do NOT Submit.
- Our goal is to receive one report per patient.

EMSIRS Overview and Summary

This data dictionary is based upon the NEMSIS Data Dictionary Version 3.4.0 and in an effort to mirror the NEMSIS Data Dictionary; much of the content is taken directly from the NEMSIS Data Dictionary. This document is intended for the software developer community. Those NEMSIS field values that will not be collected are designated by a strikethrough.

EMSIRS Version 3.1.0 Data Dictionary Content

- Data Element Name
 - The name for the data element.
- NEMSIS Version 3 Data Element Number
 - The NEMSIS Version 3 element numbering system has been revised to improve the information that can be derived from just the data element number. An example of a data element number is dAgency.01.
 - The data element number begins with either a "d" representing the demographic (agency) section or an "e" representing the EMS PCR section.
 - A one word descriptor for each section is now included in the data element number.
 - A period separates the section (e.g. dAgency) from the data element number (e.g. 01).
- National and State Element Indicator
 - National = Yes, is an indication that the data element is required to be collected:
 - at the local EMS agency level and submitted to the state
 - State = Yes, is an indication that the data element is recommended to be collected at the "State" level.
- Data Element Definition
 - The definition for the data element.
- Version 2 Number
 - The NEMSIS Version 2.2.1 Data Element Number.
 - If the Data Element is new to Version 3.4.0, the Version 2 Number will be blank.
- Data Structure Information
 - Recurrence
 - Indication that the data element can have more than one value.
 - Represented by two characters separated by a colon. The configuration includes:
 - 0:1 = element is not required and can occur only once
 - 0:M = element is not required and can repeat multiple times
 - 1:1 = element is required and can occur only once
 - 1:M = element is required and can repeat multiple times
 - Usage
 - Indication of when the data element is expected to be collected.
 - Mandatory = Must be completed and does not allow for NOT values
 - Required = Must be completed and allows NOT values
 - Recommended = Does not need to be completed and allows NOT values
 - Optional = Does not need to be completed and does not allow for NOT values
 - NOT Value Characteristics
 - Indication that the data element can have NOT values.
 - NOT Values are used (where permitted) to document that a data element was not applicable to the EMS response / request for service, was not or could not be completed.
 - NOT Values are documented as "an attribute" of an element. It allows the documentation of NOT value when a "real" value is not documented. (*Please reference the NEMSIS White Paper describing the use of NOT Values, Pertinent Negatives, and Nil.*)
 - NOT Values Accepted

- Indication of which of the following three NOT values is acceptable.
- Not all data elements accept NOT values.
- NOT Values have been condensed in Version 3.
 - Not Applicable = *The data element is not applicable or pertinent to the EMS event.*
 - Not Recorded = *If a data element was unintentionally left blank the EMS software should auto-populate it with "Not Recorded".*
 - Not Reporting = *The data element is not collected by the EMS agency or state. This NOT value does not apply to National elements where "Usage = Required".*
- Pertinent Negative Values (PN)
 - A list of Pertinent Negative Values which can be associated with a data element.
 - Not all data elements accept Pertinent Negative Values.
 - Pertinent Negative Values are documented as "an attribute" of an element. It allows the documentation of pertinent negative value in addition to the documentation of a "real" value. *(Please reference the NEMSIS White Paper describing the use of NOT Values, Pertinent Negatives, and Nil.)*
 - Example of use:
 - Example #1 - Aspirin Administration:
 - If the medication Aspirin is part of the agency protocol for Chest Pain but was not administered by the responding crew, the reason why should be documented. This is done through the use of Pertinent Negative Values. If the patient took the Aspirin prior to the EMS arrival on scene, the value "Medication Already Taken" should be documented in addition to "Aspirin".
- Is Nillable
 - Indication that the element can accept a "blank" value.
 - If the element is left "blank" the software must submit an appropriate value of one of the two attributes: Pertinent Negative or NOT Values.
- Attributes
 - An attribute provides extra information within an element. For information related to the first three attributes please see the NEMSIS document 'How to Utilize NEMSIS V3 "NOT values/pertinent negatives/nillable"'. The following are possible attributes:
 - PN (Pertinent Negative)
 - 8801001 - Contraindication Noted
 - 8801003 - Denied By Order
 - 8801005 - Exam Finding Not Present
 - 8801007 - Medication Allergy
 - 8801009 - Medication Already Taken
 - 8801013 - No Known Drug Allergies
 - 8801015 - None Reported
 - 8801017 - Not Performed by EMS
 - 8801019 - Refused
 - 8801021 - Unresponsive
 - 8801023 - Unable to Complete
 - NV (Not Value)
 - 7701001 - Not Applicable
 - 7701003 - Not Recorded

- 7701005 - Not Reporting
 - Nillable xsi:nil="true"
- Code List
 - A list of values associated with the data element. Not all data elements have predefined value sets.
 - Codes for each value:
 - The codes are based on a 7-digit number, in a 2-2-3 pattern (without dashes).
 - The first set of two numbers represent the data section
 - The second set of two numbers represent the element number
 - The last set is a 3-digit number for each value beginning at 001; The codes increase in increments of two (2).
 - Codes are typically sequential (by two) and alphabetical. Some ordering is provided in an effort to present information based on workflow.
 - Several values and codes reference external standards such as ICD-10, RxNorm, SNOMED, etc. NEMSIS will assist in providing a recommended list of EMS specific values and codes from these larger standards for most elements using these external standards.
- Data Element Editorial Comments
 - Comments are provided to describe additions, changes, clarifications, or provide additional insight into the data element.
 - Comments providing insight into specific Version 3 changes such as new or revised data elements.

National Elements that will not be collected in EMSIRS

The following elements will not be collected and should be defaulted to Not Applicable.

dConfiguration.05	Protocols Permitted by the State
eInjury.03	Trauma Center Criteria
eInjury.04	Vehicular, Pedestrian, or Other Injury Risk Factor
eProtocols.01	Protocols Used
eProtocols.02	Protocol Age Category
eVitals.31	Reperfusion Checklist
eOutcome.01	Emergency Department Disposition
eOutcome.02	Hospital Disposition

The following element will not be collected and should be defaulted to 9914075 – General - Universal Patient Care/Initial Patient Contact.

dConfiguration.10	EMS Agency Protocols
-------------------	----------------------

Ohio Retired Elements

The below listed elements will not be collected in version 3.

EMSIRS-2 Number	v2 Element Number	v2 Element Name	V3 Element Number	V3 Element Name
#027	E05_13	UNIT BACK AT HOME LOCATION DATE/TIME	eTimes.15	Unit Back at Home Location Date/Time
#031	E06_13	Ethnicity	Retired	(This is now collected in Race)
#035	E07_35	CONDITION CODE NUMBER	ePayment.51	EMS Condition Code
#039	E09_01	Prior Aid	Retired	(This is now collected in Med/Proc)
#040	E09_02	Prior Aid Performed by	Retired	
#041	E09_03	Outcome of the Prior Aid	Retired	

Is it “Not Applicable” or “Not Recorded”?

Not Applicable - At the time of EMS patient care report documentation, the information requested was “Not Applicable” to the incident or patient. For example, this value would be used to document injury related information on a patient who was ill and not injured.

Not Recorded - If a data element was unintentionally left blank, the EMS software should auto-populate it with “Not Recorded.”

Not Reporting - This data element is not collect by the state

EMSIRS Inclusion Criteria

Which incidents require submission of data to EMSIRS?

Ohio Administrative Code section 4765-13-01 gives the legal definition:

(A) “EMS Incident” means any ground or air response to a call for emergency medical services by a public or private emergency medical service organization.

(B) “Response to a call for emergency medical service” means any of the following:

(1) Treatment provided to a patient by a person who holds an EMS certificate to practice, transport of a patient from a call for EMS to an emergency care facility ...a cancelled call, or a call where a patient was treated and not transported.

(2) Transport between emergency care centers ... provided by an EMS organization.

(3) Transports of a patient from a medical care facility or emergency care facility to a residence or non-emergency transports of a patient from a residence to a medical care facility are not included within this definition.

(C) “Medical care facility” means a doctor’s office, hospital (excluding emergency department), outpatient care center, rehabilitation center, nursing home, extended care facility, or industrial clinic.

(D) “Emergency care facility” means a hospital emergency department, urgent care facility or trauma center.

In Summary:

EMSIRS Submission Criteria

The following types of runs are to be reported:

- + Transports to an emergency department
- + Transports to an urgent care center
- + Cancelled or disregarded runs not reported by another agency
- + Refusals of care
- + Treat and release
- + No patient found / gone on arrival
- + Dead at the scene
- + Transfers from an ED or urgent care center to another ED or urgent care center

The following types of runs are NOT to be reported:

- Transports to a doctor’s office
- Transports to an outpatient care center
- Transports to a rehabilitation facility
- Transports to a nursing home / skilled nursing facility / extended care facility
- Transports to an industrial clinic
- Transports to a part of a hospital other than the emergency department
- Transports to a private residence
- Incidents that are reported by another agency

DEMOGRAPHIC ELEMENTS

(Page intentionally left blank)

dAgency.01 - EMS Agency Unique State ID

Definition: The unique ID assigned to the EMS Agency which is associated with all state licensure numbers and information.

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: No

Version 2 Element: N/A

Is Nillable: No

Usage: Mandatory

Recurrence: 1 : 1

Data Element Comment

This may be the EMS Agency Name or a unique number assigned by the state EMS office. This is required to document

dAgency.02 - EMS Agency Number (Alternate ID)

Definition: The state-assigned provider number of the responding agency

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: No

Version 2 Element: D01_01

Is Nillable: No

Usage: Mandatory

Recurrence 1 : 1

Data Element Comment

This is the primary identifier for the entire Demographic Section. Each of the Demographic sections must be associated with an EMS Agency Number. An EMS Agency can have more than one Agency Number within a state. This reflects the ability for an EMS Agency to have a different number for each service type or location (based on state implementation).

dAgency.03 - EMS Agency Name

Definition: The formal name of the agency.

National Element: No

Pertinent Negatives (PN) No

State Element: Yes

NOT Values: Yes

Version 2 Element: D01_02

Is Nillable: Yes

Usage: Recommended

Recurrence 0 : 1

Data Element Comment

None

dAgency.04 - EMS Agency State

Definition: The state/territory which assigned the EMS agency number.

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: No

Version 2 Element: D01_03

Is Nillable: No

Usage: Mandatory

Recurrence 1 : 1

Data Element Comment

This has been clarified to reflect that it is the state in which the EMS Agency resides and the state associated with the EMS

dAgency.05 - EMS Agency Service Area States

Definition: The states in which the EMS Agency provides services including the state associated with the EMS Agency Number.

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: No

Version 2 Element: N/A

Is Nillable: No

Usage: Mandatory

Recurrence 1 : 1

Data Element Comment

Each state is captured as a group where the EMS agency provides service. The group includes dAgency.05, dAgency.06, dAgency.07, and Agency.08.

Element added to document all of the states in which the EMS agency provides services. Each state listed is associated with the counties, census tracts, and ZIP codes within the EMS Agency Service Area for each state.

dAgency.06 - EMS Agency Service Area County(ies)

Definition: The county(s) within each state for which the agency formally provides service.

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: No

Version 2 Element: D01_04

Is Nillable: No

Usage: Mandatory

Recurrence 1 : M

Data Element Comment

Each state listed is associated with the counties, census tracts, and ZIP codes within the EMS Agency Service Area for each state. County codes are based on ISO/ANSI codes. It is a 5-digit code based on state (2-digit) and county (5-digit).

dAgency.07 - EMS Agency Census Tracts

Definition: The US census tracts in which the EMS agency formally provides service.

National Element: Yes	Pertinent Negatives (PN): No
State Element: Yes	NOT Values: Yes
Version 2 Element: N/A	Is Nillable: Yes
Usage: Required	Recurrence 1 : M

Data Element Comment

This data element was added to better document the service area of the EMS Agency. Each state listed is associated with the counties, census tracts, and ZIP codes within the EMS Agency Service Area for each state.

Census tracts represent the smallest territorial unit for which population data are available in many countries.^[2] In the United States, census tracts are subdivided into block groups and census blocks. In Canada they are divided into dissemination areas. In the U.S., Census tracts are "Designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions, census tracts average about 4,000 inhabitants." [U.S. Census Bureau definition](#)

Finding Census tract numbers can be difficult and time consuming. Many times, researchers will refer to a Census tract as Census Tract 7 or Census Tract 9.01. But Census Tract 7 or 9.01 doesn't uniquely identify the Census tract; in fact, there are hundreds of Census Tract 7s in the United States. A Census tract is uniquely identified by using its complete 11 digit Census tract number.

For example, Census Tract 48-201-533701 is located in Harris County, Texas. The 48 is the FIPS code for Texas; the 201 is the FIPS code for Harris County; and the 533701 identifies the specific Census Tract

dAgency.08 - EMS Agency Service Area ZIP Codes

Definition: The ZIP codes for the EMS Agency's service area.

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: Yes

Version 2 Element: N/A

Is Nillable: Yes

Usage: Required

Recurrence 1 : M

Data Element Comment

This data element was added to better document the service area of the EMS Agency. Each state listed is associated with the counties, census tracts, and ZIP codes within the EMS Agency Service Area for each state.

2215015	ALS-Community Paramedicine
2215017	ALS-Nurse
2215019	ALS-Physician
2215021	Specialty Critical Care

Data Element Comment

Added to identify the level of care (license level) the EMS unit/crew can provide regardless of patient need, based on this unit's capabilities.

For example, if a unit/crew is staffed with an EMT-Intermediate or EMT-Paramedic but the unit is either licensed or stocked at a BLS level the appropriate level of care is "BLS-Basic". This is because the care provided to patients is limited to BLS skills.

eResponse.23 - Response Mode to Scene

3012001	No
3012003	Yes, At Arrival at the ED
3012005	Yes, Prior to Arrival at the ED
3012007	Yes, Sustained for 20 consecutive minutes

Data Element Comment

This element is a component of the Utstein Cardiac Arrest Criteria as identified in the American Heart Association journal "Resuscitation" from 2004 entitled "Cardiac Arrest and Cardiopulmonary Resuscitation Outcome Reports". <http://circ.ahajournals.org/cgi/content/full/110/21/3385>

This element needs to be documented when the patient has been in cardiac arrest and transported to a healthcare facility to show the change in patient condition, if any.

Any ROSC is defined as any brief (approximately >30 seconds) restoration of spontaneous circulation that provides evidence of more than an occasional gasp, occasional fleeting palpable pulse, or arterial waveform.

eArrest.14 - Date/Time of Cardiac Arrest

Definition: The date/time of the cardiac arrest (if not known, please estimate).

National Element: Yes

Pertinent Negatives (PN): No

State Element: Yes

NOT Values: Yes

Version 2 Element: E11_08

Is Nillable: Yes

Usage: Required

Recurrence 1 : 1
